8. Explosives Magazines - Blasting Mining's (Go Down/ Shed)
9. Cracker go down (MAXIN) – PESO License
10. Periodical Cylinders Testing Station .

### (Expediting Services)

- Project deadlines and schedules are more and more calculated with less buffer time to absorb delays during production by sub-suppliers. Longer delays are counter productive & always more expensive than the product by itself. To avoid such delays the project-team can benefit from Enmag Sys professional expediting services performed along with or separate from the inspections for all industries.
- Techno V Consultants has the right Personnel available to support your efforts to receive your ordered goods in timely manner. Knowledgeable expeditors visit client/supplier facilities to ensure compliance to established schedules. The expeditor oversees timely placement of purchase orders for materials and subcontracts, to ensure that materials are received and placed in production as planned and that the progress of manufacturing test, assembly and related activities are such that the required delivery date will be met.
- The entire process aims at compliances to the planned schedules, thus avoiding idling of machinery or manpower. We offer professional Inspection & Expediting services for all Mechanical, Electrical & Instrumentation Products, Etc.,

### **(Our Competency & Strengths)**

Our Auditors, Surveyors, Inspection Engineers Trainers and Competent persons are Having

- Versatile Audits & Projects Experience
- Project QA/QC Experience
- Prompt communication Practice
- Case Study and evaluation
- Service in the provision of Pipe mill and coating Inspection services.
- The experience of our personnel, coupled with the use of Knowledge on Codes and standards

We provide Comprehensive Independent Inspection for all Industrial establishments, specially Power, Process, Oil & Gas, Civil/NHAI road construction, Textile, Agro, Renewable Energy segments and not limiting to Size and Engineering Spectrum.

Though Enmag Sys is having its own Inspection procedure and reporting formats, Enmag Sys can perform Inspection as per client specified ITP / QAP stages and report in the format prescribed by the client

Our Procurement Assistance team supports in auditing, evaluation and assessment of supplier's facilities and quality management system. This service can be tailored to comply with any standard of our client requirement.

With an extensive network of experienced Pipe mill and coating Inspection personnel available on rolls, we provide first class latest technologies and specialist training, ensuring to provide our clients with the very best levels of quality of service and turnaround of information.
